Conditions - Listed on the Permit

Section IX-E of Powell County’s Zoning & Development Regulations contains the following approval criteria the Board of Adjustment must use when considering the merits of a Variance request.

Petitioners must provide responses to the Approval Criteria - (please explain the use of a “Not Applicable” response).

IX-E-1. To grant a Variance the Board must find that the granting of the Variance will be in harmony with the general purpose and intent of these regulations, will not be injurious to the neighborhood, is the minimum Variance that will make possible the reasonable use of the land, building or structure, and will otherwise not be detrimental to the public welfare, or will regularize a use that existed prior to February 20, 1996.

IX-E-2. The Board shall consider the totality of the circumstances in determining whether or not to grant or deny a request for a Variance. The Board shall consider the following criteria in making its decision:

- a. Whether special conditions and circumstances exist that are peculiar to the land, structure or building involved and that are not applicable to other lands, structures or buildings in the same district.
- b. Whether a literal interpretation of the provisions of these regulations would deprive the applicant of rights commonly enjoyed by other properties in the same district under the terms of these regulations.
- c. Whether the special conditions and circumstances result from the action(s) of the applicant.
- d. Whether granting the requested Variance will not confer on the applicant any special privilege that is denied by these regulations to other lands, structures or buildings in the jurisdiction.
- e. Whether the result of granting the Variance will conflict with the Growth Policy.
